

Reno ♦ Sacramento ♦ Point Richmond ♦ Lake Tahoe

NCE is conducting a nationwide search for a

PRINCIPAL INVESTIGATOR

for its

Transportation Research Department

NCE is seeking to expand its current transportation research capabilities at both the national and state levels. If you enjoy a challenging career in applied transportation research, this may be the opportunity for you!

NCE continues to grow and has built a reputation for the highest quality results. In the last twenty years, NCE has earned the confidence of federal, state, local agencies, and private firms through its work on projects such as

Long Term Pavement Performance Western Regional Support Contract LTPP Data Analysis

SHRP 2 Project R23 – Using Existing Pavement in Place and Achieving Long Life Pavement Noise Monitoring and Analysis

Crumb Rubber Modifiers

WesTrack Experimental Road Test

The exceptional candidate will have a proven track record of successful research projects, project management, strong client skills, writing & winning research proposals, as well as implementing research results. The individual will work with NCE staff to win new research projects and bring together the resources that will assure the high quality outcomes NCE expects.

Continued participation on national committees (such as TRB, ASTM, or AAPT) is highly encouraged. While business development and client interaction would be a critical element of the position, relocation is not required.

NCE offers an opportunity to work with some of the nicest individuals anywhere!
(An excellent benefits package is offered as well)
