

2/11/2010

Nichols Consulting Engineers (NCE) is currently seeking to hire a Project Engineer for our Sacramento, CA office.

The selected person must have the skills and abilities to:

- Create plans, specifications, and cost estimates for civil engineering projects including road rehabilitation, civil improvement projects, and utility design (i.e. storm drain, sewer, water);
- Be proficient in AutoCAD Civil 3D 2009 or later;
- Proficiency in Microsoft Office Products;
- GIS experience and integration with CAD design (preferred);
- Local experience in the Sacramento Area (preferred);
- Analyze civil design data;
- Prepare and write short reports (e.g. Basis of Design Report);
- Experience with preparation of proposals, fee estimates, and project schedules;
- Calculate and manage simple, small fee, non-complex project budgets;
- Organize field work and assign tasks to technicians and staff engineers;
- Evaluate field data;
- Have a valid driver's license.

Minimum Position Requirements:

B.S. – with four to seven years experience,
or, M.S. – with three to seven years of experience
California P.E.

The selected candidate will find NCE to be a firm that sets its standards high by attracting the best Engineers in our industry. NCE offers an exceptional benefit package which includes, health benefits for employees and their dependents, 401(k) participation, flexible work schedules, Paid Time Off (PTO), holiday pay and much more.
