

2/11/2010

Nichols Consulting Engineers (NCE) is currently seeking to hire a registered Senior Level Geologist, Hydrogeologist or Engineer for our Sacramento, CA office. The candidate should have knowledge of contaminated site characterization investigations, remediation methodologies, experience with the California regulations and experience with the RWQCB and DTSC, and working knowledge of Brownfield related projects.

The ideal candidate will have the skills and abilities to:

Manage Client Relationships:

- Manages assigned projects to meet client requirements
- Identifies and pursues new business opportunities, assists in developing project scope and manages the allocation of resources to complete assigned projects
- Communicates effectively with clients and responds effectively to meet the client's needs
- Ensures positive and ongoing relationship with clients
- Assists in developing proposals to new and existing clients

Project Management:

- Independently evaluates, selects, and applies standard techniques, procedures, and criteria to perform technical tasks, field tasks, studies, and analysis with ongoing review, coaching, and interaction from project team management
- Prepares and generates moderately complex reports and correspondence; some involvement in preparing more complex reports; writes reports
- Reviews field reports prepared by staff specialists; provides guidance to office and field personnel as directed by project manager
- Collects data in complex field situations without supervision
- Calculates and manages moderately complex project budgets
- Organizes field work and assigns tasks to staff specialists; assembles, reviews, and evaluates complex data; integrates data evaluations prepared by staff specialists into project scheme
- Contact with internal and external clients and contacts vendors; researches literature and regulatory requirements
- Evaluates field data
- Must be able to perform job responsibilities safely

Preferred Qualifications:

- Five to eight (plus) years professional consulting experience
- Experience preparing reports that demonstrate technical knowledge with limited supervision
- Excellent communication skills (written/verbal)
- Experience working independently and providing possible solutions on complex problems
- Knowledge of California rules and regulations
- Flexibility to work outside normal business hours
- P.E for engineers; appropriate registration/certification for other disciplines
- Hazard Communication (29 CFR 1910.120)

The selected candidate will find NCE to be a firm that sets its standards high by attracting the best Engineers in our industry. NCE offers an exceptional benefit package which includes, health benefits for employees and their dependents, 401K participation, flexible work schedules, Paid Time Off (PTO), holiday pay and much more.
